
PROGRAM DESCRIPTION

The EMD Serono Fertility Instant Savings program is a fertility medication discount program aimed at increasing access to all prescribed EMD Serono fertility medications.

This new pricing program provides patients that have been prescribed an EMD Serono fertility medication with reduced out-of-pocket prices.

Patients can access the reduced pricing on their prescribed EMD Serono Fertility medications in one of two ways:

1. They can fill out a short online form on FertilityInstantSavings.com, EMD Serono's program website, and instantly receive the information they need to redeem the medication savings at participating pharmacies.
2. They can receive a coupon code on TrumpRx.gov and redeem it for medication savings at participating pharmacies.

This new discount is for U.S. patients 18 years of age or older paying out-of-pocket (i.e. not using insurance) for their prescribed EMD Serono fertility medications. This can mean:

- Patients who are paying out-of-pocket for the entirety of their fertility treatment services and medications
- Patients who are choosing to use their insurance to pay for fertility treatments, but paying out-of-pocket for their prescribed EMD Serono fertility medications
